

Henrik Larsson Hestnes

Software Engineer · M.Sc. Cybernetics & Robotics

Rio de Janeiro, Brazil henrik@henrikhestnes.com henrikhestnes.com
github.com/henrikhestnes linkedin.com/in/henrikhestnes

Norwegian software engineer at Solution Seeker since 2023, currently working from Rio de Janeiro. M.Sc. in Cybernetics and Robotics from NTNU with an A average, specialised in real-time systems, with a master's thesis in machine learning. Outside work I build small, dependency-free tools: hand-written CUDA kernels, native macOS utilities and an offline-first language-learning site.

Experience

Software Engineer · Solution Seeker — Aug 2023 – present
Oslo, Norway · Rio de Janeiro, Brazil since 2026
One of five developers who own the company's entire back end and self-hosted infrastructure. I work mainly on the data pipelines and integrations that bring customer data in, the Kafka-based event-driven architecture, and data import and export, and I am the responsible engineer for several customers.

Research Assistant · NTNU — Jan 2023 – Jun 2023
Trondheim, Norway · part-time
Research assistant in TDT4127 Programming and Numerics.

Teaching Assistant · NTNU — 2020 – 2022
Trondheim, Norway · part-time, four semesters
Taught programming to first-year students: TDT4102 Procedural and Object-Oriented Programming (C++) twice, and TDT4110 Introduction to Information Technology (Python) twice.

Summer Intern · Accenture — Jun 2022 – Aug 2022
Oslo, Norway
Full-stack Java developer in a cross-functional team building an indoor-navigation app with augmented reality on Android.

Summer Intern · Cisco — Jun 2021 – Aug 2021
Oslo, Norway
Back-end C++ developer on a framework that collects metrics from separate parts of an embedded system and presents them in real time.

Reconnaissance Soldier · Norwegian Armed Forces
Aug 2017 – Jul 2018
2nd Battalion, Skjold
Responsible for radio communications in a four-soldier reconnaissance patrol.

Earlier: part-time salesperson in the paint departments of MAXBO Hvam and Alna, 2016–2017 and 2020.

Education

M.Sc. Cybernetics and Robotics · NTNU — Aug 2018 – Jun 2023
Trondheim, Norway · A average
Specialisation in real-time systems.

> Thesis (grade A): *Machine Learning-Enabled Predictive Modeling of Building Performance for Electricity Optimization*, supervised by Prof. Adil Rasheed.

Exchange year · UC San Diego — Sep 2021 – Jun 2022
San Diego, United States · GPA 3.86 / 4.0
Graduate coursework in cybernetics and robotics as an exchange student from NTNU, including GPU programming with CUDA.

Projects

Fala Gringo
HTML · JS · PWA
Free, offline-first drills for spoken Brazilian Portuguese, with sister sites for English and Norwegian.

CUDA matrix multiplication
CUDA · C++ · Pybind11
Hand-written naive and shared-memory tiled kernels, called from Python and benchmarked against NumPy.

Autotennis
Python
A service that books tennis and padel sessions at the university club.

macOS tools
Swift · AppKit
MacMiddleClick, MacMural and MacSnip: dependency-free menu bar apps. Contributor to the OmniWM tiling window manager.

Volunteering

Key Account Manager · UKA-19
2019 – 2022
Owned the relationship and contract with Sit, one of the student festival's five main partners.

Business Relationship Manager · Nettverksdagene
2020 – 2021
Recruited companies to the career fair and was their contact through planning and execution.

Leader · Omega Kielderstyre
2018 – 2020
Led the 14 student volunteers running the licensed bar Kielderen and its social events, with personnel responsibility. Committee and board member before that.

Football Coach · Omega FK
2019
Ran the team's administration and finances, match management and tactics.
